- Tolerance of Inductance:K= ±10%,M= ±20%,N= ±30%
- DCR:The nominal DCR is measured from point"a" to point "b",as shown above on the mechanical drawing.
- Isat:DC current that will cause inductance to drops by 20% typical. (Ta=25℃)
- Irms:DC current for an approximate temperature rise of 40℃ without core loss,derating is necessary for AC currents, PCB pad layout,trace thickness and width,air-flow and proximity of other heat generating components will affect the temperature rise it is recommended the part temperature not exceed 125℃ under worst case operating conditions verified in the end application.

Application Notice

1.Storage Conditions

To maintain the solderability of terminal electrodes:

- (1)Temperature and humidity conditions:<35℃ and<35~65%RH
- (2)Recommendation:inductors should be used within 6 months from the time of delivery.
- (3)Packaging material should be kept away from where chlorine or sulfur exists.

2.Soldering

(1)Lead-free the recommended reflow condition(SMT Type)

(2)Lead-free recommended Wave soldering(DIP Type)

(3)Soldering Iron

- a.Use a soldering iron to solder inductors by hand,time does not exceed 350 degrees 3 seconds.
- b.When soldering iron welding,please try to avoid contacting the inductor itself.(definitely do not contact the coil)
- c.To solder inductors by soldering iron is not recommended.

3.Precautions

- a.When using our inductors,please carry out product assembling test and evaluation of product operating environment.
- b.Non-magnetic shielded inductors,when design circuit,should pay attention to its space allocation in order to avoid electromagnetic interference which can cause malfunctions.
- c.Do not place inductors near magnet or any magnetic objects.
- d.Do not use or store inductors in a corrosive gas environment.(example:salt,sulfur,acid,etc..)
- e.The catalogue specification for reference only.Please check the official specification from CHIKARA datasheet as approved.
- f.Inductance element described in this catalog,is generally applied to consumer electronic devices.For the following applications, please contact us, in order to confirm for the product information.
Life-hreatening safety equipment,such as :Transport/Transportation/Disaster/Medical/public infocomm equipment...etc.
high security and reliability of applications,such as :Aerospace/Aviation/military equipment..etc,while for high security/high reliability of general electronic equipment/circuits,please adequate safety and reliability,append the protection circuit when necessary.
